SUPPLEMENT TO

1. The Andreyev airfield (49°06'N/43°23'E), Stalingrad Oblast, was located about 2 km southeast of the town, about 2 km east of the highway to Stalingrad (49°05'N/43°25'E). The installation was on almost level terrain; there were no concrete runways or taxiways. Two temporary buildings, each of them about 7 meters long, were on the southwestern edge of the field. Aircraft were apparently not serviced there.
2. A biplane approaching from the direction of Stalingrad used to land at the field every afternoon or evening. It could take off again the following day. Parachuting from a biplane was done almost daily.
